

Exciting announcement!!

Malavich Family Dental would like to share some very exciting news. First, we would like to express our sincere gratitude and appreciation for your continued support through the years and for the trust you have placed in us for the treatment of yourselves, your family, and friends. To continue providing excellent care, our office will be merging with another local practice, Schmerler Family Dentistry. We will be moving to a state-of-the-art new office only two miles away! We will now be able to deliver high quality care five days per week along with extended office hours. You will continue to see all our familiar faces as the entire staff, including myself, Kathy, Meghan, and Dora will all be moving. In addition to welcoming you to our sparkling new office, I would like to introduce you to my new partner, Dr. Andrea Schmerler.

Dr. Andrea Schmerler was born and raised in Cincinnati, Ohio where she attended Sycamore High School. Dr. Schmerler graduated from Indiana University with a Bachelor of Science degree in Psychology in 2000. She received her Doctorate of Dental Surgery (DDS) degree in 2004 and a fellowship in advanced general dentistry in 2005 from the Ohio State University. Dr. Schmerler has been in private practice since 2005 providing general dentistry to adults and children. Dr. Schmerler is dedicated to providing compassionate, high quality dental care with the hopes of building patient relationships that will last for years to come. Dr. Schmerler lives locally with her husband Vlad and her two sons, Sammy and Isaac. She enjoys traveling, reading, exercising and loves spending time with her friends and family.

Beginning in January 2018, we will be scheduling appointments at the new office, Beckham Square Family Dental. The new address is 12500 Reed Hartman Hwy #110 and is conveniently located at the corner of Fields Ertel Rd. and Reed Hartman Highway. We look forward to many years of continued excellent dental service and patient care at our new location. If you have any questions, please do not hesitate to call us at 513-769-4873.

Sincerely,

Dr. Scott Malavich
